

# Cutting

### 3 solutions for cutting parts in a safe environment :

- **PERFECT wheels** (1) (page 37), high performance solution for cutting of parts in stainless steel, hard steels and other particular steels.
- **NUANCE wheels** (2) (page 37), a full range of polyvalent wheels for your industrial applications, with a high efficiency and an important lifetime.
- **XTRA wheels** (page 36), a high performing zirconium wheels range to work on stainless steel and special steels.

## Snagging, scuffing welding points and scouring of rust and old paints.

PREMINES sells a large range for your important cutting power works.

- **Fibre discs FR 748 and FR 928** (1) (page 34), the ideal solution for snagging and scuffing operations, which need high aggressiveness and efficiency (diam 115 and 125mm, P36 to P120).
- **Flap discs TR 920** (2) (page 35), a flap discs range used in many industries for various applications, which need an important cutting power (diam 115 and 125mm, P40 to P80).
- **Snagging wheels** (3) (pages 36 et 37), a full range of wheels for snagging works, which require a high efficiency and high lifetime.
- **Belts TR570** (4) (page 27), a quick and efficient solution for touching up flat areas, which require an important cutting power without any alteration of the part shape (P40 to P120).
- **Laminate Quick Change Discs** (5) (page 39), a range available in many formats and grits, especially designed for scouring areas difficult to access (diam 38 to 76mm, P40 to P120).
- **PR777 discs** (6) (page 29), a disc range on a paper backing, guaranteeing an important cutting power and a high finishing level. (diam 150mm, P40 to P100).

## Complementary products and accessories

A full range of **fibre discs backing-** for grinding operations (page 49).

**Laminate Quick Change Disc Backing** (page 49), adapted to all kind of angle grinders.

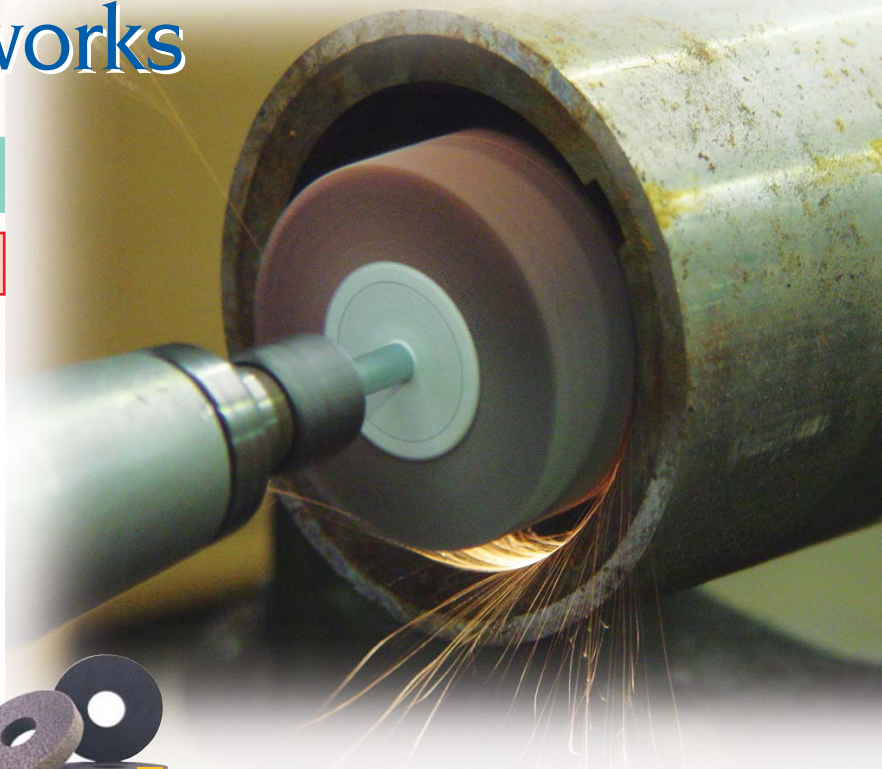

A full range of **pads** for your sander applications (page 49).

A full range of **anti-dust masks** for individual users protection (page 47).

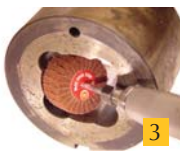

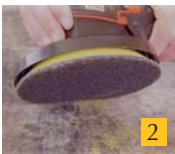

# Metal works

## Semi-finishing works

### Machining, Surfacing

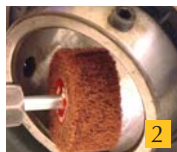

#### 5 solutions for all your semi-finishing works :

- **2 versions** : Laminate Quick Change Discs (1) (page 38) or velcro discs (2) (page 38) : polyvalent solution for all cleaning operations and surface preparation on various materials.
- **Flap wheels (3)** (page 35) : optimal solution for all kind of surfacing/machining works. To be used on a grinding machine with a 6mm shank.
- **Finishing combined wheels (4)** (page 42): a combination wheel range (abrasive cloth and non-woven structure), used for all kind of cleaning of stainless steel parts, ferrous and non-ferrous metals. Ideal solution for small cleaning operations with a shining finishing.
- **Compressed wheels (5)** (page 42): to be used on grinding machine, for all surfacing operations and cleaning before painting. Snagging and finishing in one operation on all metals (stainless steel, steel, titan, aluminium).

## Finishing works

### Polishing, super finishing

#### Prémines sells a large range of products for your finishing operations on metals :

- **Polishing Quick Change Discs (1)** (page 38) : ideal solution for a uniform finishing on stainless steel and aluminium.
- **Super finishing wheels (2)** (page 42): a wheel range, made of a non-woven structure, for polishing operations and finishing on areas difficult to access, which guaranties a satin finishing on stainless steel.
- **Diamond abrasive (3)** (page 43) : a diamond abrasive range for touching up which needs a high finishing level on hard materials and a high lifetime.
- **TR512 rolls (4)** (page 18): the ideal solution for hand finishing application, part cleaning. All kind of materials : copper, brass, ferrous metals,....
- **NYLONFLEX Abrasives (5)** (page 43): a non-woven abrasive range, especially designed for cleaning and finishing all kind of materials. Its high flexibility allows a quality work on all kind of complex shapes.
