

Cone points and spiral bands

CONE POINTS OXAPOINT

USE :

Used in production and maintenance for the homogenisation, polishing, cleaning and deburring of all metal, composite, glass fibre and plastic.

TECHNICAL DATA : Cloth backing, aluminium oxide, resin.

ADVANTAGES

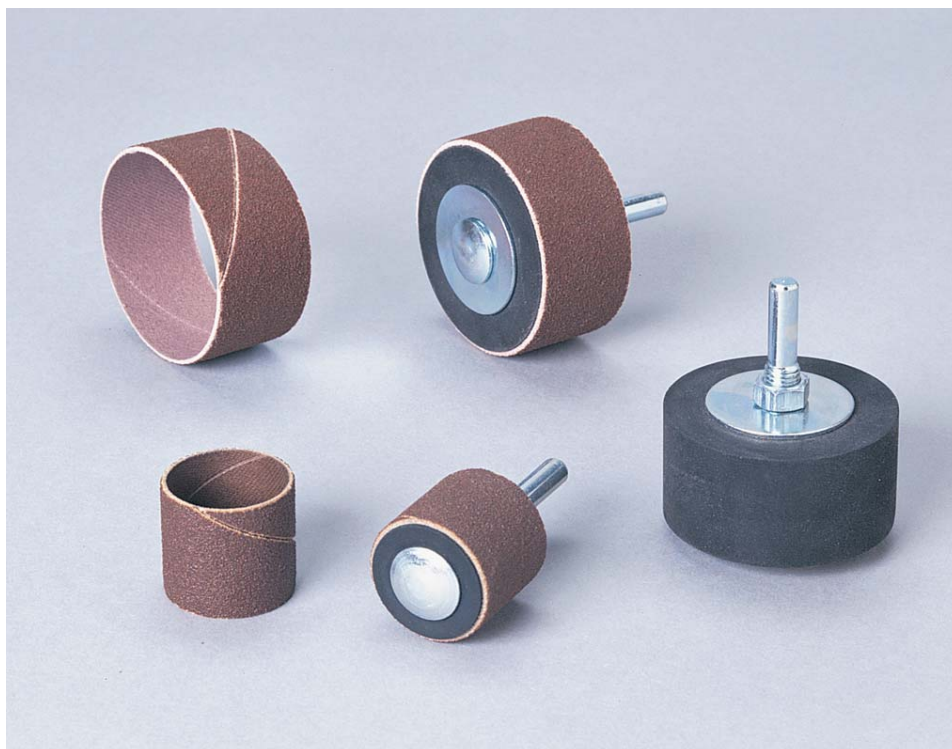

- ✓ **HIGH GRINDING PRECISION.**
- ✓ **HIGH ACCESSIBILITY** in **AREAS DIFFICULT TO ACCESS.**
- ✓ **REGENERATION OF THE CUT POINTS** while grinding.

SPIRAL BANDS

USE :

For a finishing on curved, shaped or difficult to access surfaces. To remove separation lines, imperfections and scratches of all areas type. Fixed on a support.

TECHNICAL DATA : Cloth backing, aluminium oxide, resin.

ADVANTAGES

- ✓ **EASY TO USE** no tool is necessary to change the spiral band.
- ✓ **NO JUMP AND NO SHOCK** due to the rolling up precision.
- ✓ **STURDINESS OF THE BELT.**

Cylindrical and conical rolls

CYLINDRICAL ROLLS OXAROLL

USE : A range of cylindrical rolls to use with a steel stem. Ideal for welding flashings removal, polishing, handling marks eliminating and breaking of the edges deburring.

TECHNICAL DATA : Cloth backing, aluminium oxide, resin.

**PRICES, GRITS AND SIZES
UPON REQUEST.**

ADVANTAGES

- ✓ **AN EXCEPTIONAL LIFETIME.**
- ✓ Regeneration of **THE CUTTING POINTS WHILE USING.**

CONICAL ROLLS OXAROLL

USE : A range of conical rolls to use with a steel stem. Ideal for welding flashings removal, polishing, handling marks eliminating and breaking of the edges deburring.

TECHNICAL DATA : Cloth backing, aluminium oxide, resin.
