

Diamond abrasives and nylonflex range

DIAMOND ABRASIVES

A new generation abrasive range for exceptionally demanding works.

USE : From deburring to polishing due to its thanks to a very large range of grits (40 to 8000). To be used on many materials: steel, stainless steel, composite, glass, marble and concrete.

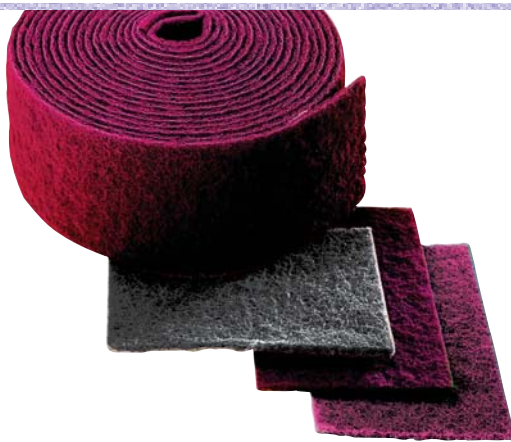

TECHNICAL DATA : Metallic cloth backing (polyester monofilament), diamond grits, metallic bond or resin.

MAIN SIZES :

- Sanding block and sheet for manual use.
- Disc and belt for dry or wet mechanised application.

ADVANTAGES

- ✓ **GRITS ' HARDNESS AND A CONSTANT CUTTING POWER FOR AN OPTIMAL PRODUCTIVITY.**
- ✓ **LOW CLOGGING** for an **EXCELLENT LIFETIME.**
- ✓ **A HIGH QUALITY FINISHING.**

NYLONFLEX ABRASIVES

USE : Soft and flexible, the Nylonflex can be used for dry or wet sanding with all grease removers. Edges scuffing before painting.

TECHNICAL DATA : Abrasive made of non-woven nylon fibres for a controlled finishing on the areas difficult to access (joints, doors interior...)

2 colours/Aggressiveness:

- **Red / Very fine** (aluminium oxide): for surface preparation, new parts.
- **Grey / Ultra fine** (silicon carbide) for the edges preparation before painting.

BOXES OF 60 'PRECUT' SHEETS
